Presence on social media platform LinkedIn

1. Scope of data collection and storage

| No. | Data | Purpose | Legal basis |
|-----|--|--------------------------------------|-------------------------|
| 1. | User interactions (postings, likes, etc.) | User communications via social media | Art. 6 (1) lit. f) GDPR |
| 2. | Cookies | Target group advertising | Art. 6 (1) lit. f) GDPR |
| 3. | Statistical data on user interactions in aggregated form, i.e. without direct personal references for Hornbach (e.g. page activities, pages viewed, page previews, likes, recommendations, contributions, videos, page subscriptions, including origin and times of day) | Target group advertising | Art. 6 (1) lit. f) GDPR |

We have set up a page on the social media platform LinkedIn which we manage together with the operator of the social media platform. This is LinkedIn (LinkedIn Ireland Unlimited Company, Wilton Plaza, Wilton Place, Dublin 2, Ireland) for the page at <https://www.linkedin.com/company/hornbach-holding>.

2. Processing of your personal data

In what follows, we inform you about the processing of your personal data when you visit the social media platform LinkedIn. The operator of the respective social media platform is solely responsible for the internal processing of personal data on the social media platform on which we operate our social media page (please see 3. below).

We use our social media page for the purpose of communicating with our followers and other interested parties. Data is processed on the basis of our aforementioned legitimate interests (Art. 6 (1) lit. f) GDPR) and, where applicable, to respond to any messages, inquiries, contributions, or commentaries that you address to us (Art. 6 (1) lit. b) GDPR).

Furthermore, the social media platforms provide us with anonymous usage statistics (analytical services and page insights data) for our social media page on the basis of the actions and interactions of our followers (e.g. likes, shares, commentaries, etc., number of followers, views of individual sections of pages, scope of any contribution, and statistics on followers broken down by professional function, industry, location, company affiliation). These assist us in entering into contact with our followers and interested parties, to understand the use and scope of our contributions, to evaluate content, and to identify usage preferences and address our social media page as closely as possible to our target groups. We do not have any influence over or access to the compilation or processing of these usage statistics; these activities are performed by the operator of the respective social media platform acting under its own responsibility and without our being able to view the personal data of individual followers or users. This data processing is performed on the basis of our aforementioned legitimate interests (Art. 6 (1) lit. f) GDPR).

***Note:** The personal data publicly visible in your profile depends on your profile settings, which you can alter yourself in your settings on the social media platform. In general, you should ensure that you do not communicate or share any sensitive data or confidential information (e.g. application documents, bank or payment data) via social media platforms. We recommend that you use a secure form of communication (e.g. post, e-mail) to communicate or share such information.

3. Processing of your personal data by the social media platform LinkedIn

The operator of the respective social media platform is solely responsible for the processing of personal data by the social media platform LinkedIn. This operator processes personal data of yours when you visit the social media page that we operate on the social media platform LinkedIn; in general, this data is processed irrespective of whether you have a user account on the respective social media platform or are logged into the respective social media platform; furthermore, the operator generally deploys cookies and other storage and (in some cases cross-

device) tracking technologies. LinkedIn informs users as to the methods and scope of data processing in its Privacy Policy. You can find this at the following link: <https://de.linkedin.com/legal/privacy-policy>.

LinkedIn also provides us with anonymous usage statistics (page insights data) for our social media pages based on the actions and interactions of our followers. We do not have any influence over or access to the compilation or processing of these usage statistics or the underlying data; these activities are performed by the operator of the respective media platform (LinkedIn) acting under its own responsibility and without our being able to view the personal data of individual followers or users.

In addition, LinkedIn may independently compile personalized usage statistics, for example for its own market research, advertising, or other commercial or business purposes and, to this end, also process data outside the European Union. Here too, we do not have any influence over or access to these activities.

You can find further information about the processing of your personal data by the operator of the social media platform LinkedIn in connection with interest-based advertising and about the settings options for your profile and your advertising preferences at the following LinkedIn support pages: <https://www.linkedin.com/help/linkedin/answer/1569/ihre-konto-und-datenschutzeinstellungen-verwalten-ubersicht?lang=de>
