

HORNBACH Holding AG & Co. KGaA
Group

2018/19

Group Non-financial
Statement

HORNBACH.
Holding

Non-Financial Group Report

1. Fundamentals of Non-Financial Group Report

1.1 Group structure and business model

The structure and business model of the HORNBACH Group are presented below.

HORNBACH Holding AG & Co. KGaA is the parent company of the HORNBACH Group. It does not have any operations itself, but has a number of major subsidiaries. In addition to HORNBACH Baumarkt AG, the largest operating subgroup at which the do-it-yourself (DIY) retail activities across Europe are pooled, the HORNBACH Group also comprises the HORNBACH Baustoff Union GmbH subgroup (regional builders' merchants) and the HORNBACH Immobilien AG subgroup (real estate and location development). As of the balance sheet date on February 28, 2019, the Group had a total of 21,055 employees, of which 8,926 outside Germany. In the 2018/19 financial year (March 1, 2018 to February 28, 2019), the HORNBACH Group generated net sales of € 4.4 billion. The HORNBACH Group was founded in 1877 and is family managed, now in the fifth generation. It has the legal form of a partnership limited by shares (KGaA) and is publicly listed.

In accordance with the Articles of Association, the general partner of HORNBACH Holding AG & Co. KGaA is HORNBACH Management AG, represented by its Board of Management, which currently consists of two members. The Board of Management of the general partner manages the business of HORNBACH Holding AG & Co. KGaA and represents the company to third parties. Hornbach Familien-Treuhandgesellschaft mbH holds all shares in the general partner of HORNBACH Holding AG & Co. KGaA.

Our business activities focus on do-it-yourself (DIY) retail with DIY stores and garden centers, as well as on online DIY retail in Germany and eight other European countries. These retail activities, which focus on the needs of private end customers (business-to-consumer: B2C), are managed at HORNBACH Baumarkt AG, which is by far the largest operating subgroup. The DIY product range is structured in five product divisions: hardware / electrical, paint / wallpaper / flooring, construction materials / timber / prefabricated components, sanitary / tiles, and garden.

In addition, HORNBACH is also active in the regional builders' merchant business via its HORNBACH Baustoff Union GmbH subsidiary (HBU), which chiefly focuses on specialist retail with commercial customers in the main and secondary construction trades (business-to-business: B2B).

The principal task performed by the HORNBACH Immobilien AG subgroup is to support the DIY retail business by developing stationary retail properties for group-internal use.

The internationalization of procurement provides us with broad-based access to global procurement markets and enables us to forge strategic, long-term partnerships with suppliers and industry. These partnerships benefit both sides. We offer each supplier and manufacturer the opportunity to structure the B2B supply chain as efficiently as possible. Suppliers are able to make large-scale logistical deliveries directly to each location, or to supply the merchandise indirectly via our central logistics hubs. This way, we provide regional manufacturers as well with the opportunity of growing outside their existing sales regions and supplying goods to additional countries.

With net sales of € 4.1 billion in the 2018/19 financial year, the HORNBACH Baumarkt AG subgroup contributed 94 % of consolidated sales and employed around 96 % of the HORNBACH Group's total workforce at the balance sheet date. The HORNBACH Baustoff Union GmbH (HBU) subgroup accounts for € 265 million, and

thus around 6 % of sales, as well as for around 4 % of the Group's employees. HORNBACH Immobilien AG does not have any operating customer business or proprietary employees.

1.2 Materiality analysis

Pursuant to § 289c HGB, non-financial topics count as material when they have significant implications for CSR aspects (environment, employees, human rights, social welfare, and anti-corruption) and are also relevant to the Group's business activities (business performance, business results, and situation).

In the 2018/19 financial year, the managers responsible for the respective topics at the Group reviewed whether their assessment of the non-financial topics within the Group's own business activities or supply chain and at customers which impact on the aspects defined in § 289c of the German Commercial Code (HGB) had changed to any significant extent compared with their assessment in the previous year. To this end, in an updated materiality matrix the non-financial topics were evaluated in terms of their relevance for our business activities and their implications for the aspects defined in § 289c HGB.

The managers responsible for the respective topics concluded that the following material topics identified in the 2017/18 financial year are still equally valid. These topics have therefore also been taken as the basis for the 2018/19 Non-Financial Group Report:

1. Product range and customer information
2. Responsible procurement
3. Product responsibility
4. Employee satisfaction
5. Employee recruitment
6. Employee development and retention
7. Compliance

The findings were agreed with the Board of Management of HORNBACH Management AG in order to ensure consistent and comprehensive reporting for the overall Group.

1.3 Risk assessment

All material non-financial topics were subject to a risk assessment to ascertain whether our business activities, supply chain, or customers gave rise to any material risks for the aspects defined in § 289c HGB. Our group-wide risk management did not identify any risks requiring report at the HORNBACH Holding AG & Co. KGaA Group.

1.4 Sustainability management

We base all of our group-wide entrepreneurial actions on the HORNBACH Values. These provide a firm foundation for the values underpinning our dealings with customers, as well as our conduct towards our fellow employees. Furthermore, we also base our actions on HORNBACH's CSR Policy, which includes the following core requirements:

- Equal opportunities in selecting and promoting our employees.
- Minimum requirements in our suppliers' production sites.
- Flawless quality of our products.
- Enhancing our product range to account for sustainability.
- Recycling and waste avoidance in our business operations.

We are convinced that responsibility as embodied in corporate social responsibility (CSR) is a prerequisite for our long-term economic success and for our company's future prospects.

The strategies, targets, and management approaches for those non-financial topics deemed material are mainly defined by HORN BACH Baumarkt AG and managed by that company's Board of Management. The Board of Management is regularly involved in topic-specific measures and kept informed about their implementation. The topics of product range and customer information, responsible procurement, and product responsibility are allocated to the member of the Board of Management responsible for procurement, imports, store planning, store development, quality management, environment, and CSR. The topics of employee recruitment, employee satisfaction, and employee development and retention are managed by the member of the Board of Management responsible for personnel (labor director), who is responsible for marketing, market research, internal communications, public relations, organizational development, and personnel. The topic of compliance (anticorruption measures) is managed by the member of the Board of Management responsible for real estate, construction, technical procurement, internal audit, legal affairs, and compliance.

At the HORN BACH Baustoff Union GmbH subgroup, the management is responsible for the strategies, targets, and management approaches for those non-financial topics deemed material. The topics of product range and customer information, responsible procurement, and product responsibility are allocated to the Chairman of the Management (Operations Director), who is responsible for the strategic development, outlet operations, real estate, marketing, and logistics divisions. The topics of employee recruitment, employee satisfaction, employee development and retention, and compliance are allocated to the Commercial Director, who is responsible for the finance and accounting, risk management and controlling, personnel, information technology, technical procurement, and legal and compliance divisions.

Within the Board of Management of HORN BACH Management AG, the general partner of HORN BACH Holding AG & Co. KGaA, the CEO is responsible for the operating business at the two subsidiaries HORN BACH Baumarkt AG and HORN BACH Baustoff Union GmbH.

1.5 Framework

Reporting contents are based exclusively on the materiality definition and content requirements set out in the German CSR Directive Implementation Act (CSR-RUG). No use has been made of any framework.

2. Material Non-Financial Aspects

The HORN BACH Baumarkt AG subgroup holds a dominant position within the HORN BACH Group, and that both in terms of business activities and of their implications for the aspects defined in § 289c HGB as they pertain to the HORN BACH Holding AG & Co. KGaA Group. The Baumarkt subgroup in turn generates the predominant share of its retail sales with private end customers (B2C). The B2C retail business at HORN BACH Baumarkt AG therefore contributes by far the largest share of the Group's sales and is also the most important lever in terms of implications for the aspects defined in § 289c HGB.

The material non-financial aspects identified for the Group are also relevant to the HORN BACH Baustoff Union GmbH subgroup. To further enhance the HORN BACH Group's non-financial reporting, a review was performed in the 2018/19 financial year to determine the extent to which the concepts outlined in the Non-Financial Group Declaration of HORN BACH Holding AG & Co. KGaA are also applicable to HORN BACH Baustoff Union GmbH. The reporting has been supplemented in relevant sections to include the perspective of HORN BACH Baustoff Union GmbH.

In view of this, unless indicated otherwise, the concept described in this non-financial group report relates to the targets, strategies, management approaches, and measures at the HORN BACH Holding AG & Co. KGaA Group. In what follows, the terms "we", "HORN BACH" and "group-wide" are synonymous with the entire HORN BACH Group. Diverging from this approach, we explicitly refer to any concepts pursued solely on the level of the HORN BACH Baumarkt AG or HORN BACH Baustoff Union GmbH subgroups.

2.1 Product range and customer information

2.1.1 Targets and strategy

Our DIY stores with garden centers, DIY online shops, and builders' merchant outlets provide our customers with a broad and deep product range and also offer product and project-based information and competent advice with regard to product features and their suitability for implementing specific construction and renovation projects. This way, we aim to enable our customers to make the right purchase decision for their situation. The ability to make a well-informed, independent decision in favor of or against a specific product is a prerequisite for high customer satisfaction and for building a permanent, trust-based customer relationship. This in turn forms the basis for the Group's business success.

By offering the maximum possible transparency concerning the source, contents, and environmental implications of our product ranges – throughout their entire lifecycles – we also aim to enable our customers to consider ecological, health, and social welfare factors when reaching their purchase decisions. Given consumers' ever growing interest in responsible lifestyles, increasing the range of corresponding products on offer also harbors growth opportunities for the company.

2.1.2 Management approach and measures

Internal evaluations and external consumer surveys provide us with indications of our customers' satisfaction with our product range and the information and services we offer.

As part of our operating activities, we collect feedback from our customers and analyze their purchasing behavior. We also factor customer evaluations posted at our online DIY stores into this process. On this basis, we endeavor to continually align our product range, services, and associated information and advice more closely to customers' needs. Not only that, when it comes to independent consumer surveys conducted to evaluate the performance of stationary DIY stores and garden centers in the European countries in which the Group operates we accord priority to being ranked among the best providers in terms of overall satisfaction, product range selection, specialist advice, value for money, and prices compared with competitors.

To ensure that our employees are available for customers, and thus also safeguard the quality of advice provided in our retail business, we base our staff deployment planning on expected seasonal customer frequency volumes. Two key factors highly significant to our business success are the ability to attract qualified specialist staff and the provision of regular training and further development measures to our employees. Furthermore, the HORN BACH Baumarkt AG subgroup provides digital product information and video tutorials in its online stores and on social media. These offer information on how to use the products, for example, or explain DIY projects on a step-by-step basis ("HORN BACH Meisterschmiede").

Our product range gives customers the option of using low-emission products for their construction and renovation projects and this way to minimize the use or presence of harmful substances in their living environments. These products are labeled with widely recognized seals, such as Blauer Engel or the eco-INSTITUT seal, which are applied for by the respective manufacturers and displayed on the packaging. Furthermore, we actively indicate the energy and water-saving functions of products and do not stock controversial products

www.hornbach-group.com
Investor Relations >
Corporate Governance >
HORN BACH Values

or articles that pose a risk to the environment, such as glyphosate herbicides or plants whose cultivation involves the use of neonicotinoids (bee conservation).

The procurement organizations at HORN BACH Baumarkt AG and HORN BACH Baustoff Union GmbH manage our product range and the need for product and project-based customer information. To enable us to account as closely as possible for customers' needs in the countries in which we operate our retail business, the procurement organizations account for both central and regional requirements when listing suppliers.

As a matter of principle, we base our product range on the HORN BACH Values. Conversely, that means we reserve the right to delist product ranges when they clearly infringe the HORN BACH Values.

2.1.3 Target achievement status

HORN BACH does not collect any quantitative key performance data to measure or manage satisfaction with its product and application information or the sustainability of the product range. The company refers exclusively to qualitative indicators for this non-financial aspect. To this end, HORN BACH refers to numerous consumer surveys conducted by external service providers. The company's aim is to maintain its very good rankings across Europe and to improve those rankings that are less good.

In Kundenmonitor Deutschland (Servicebarometer AG) and equivalent consumer surveys conducted in other European countries in the 2018/19 financial year, the HORN BACH Baumarkt AG subgroup was ranked first or second in the "Overall satisfaction" shown by customers with DIY and home improvement stores, and that in all regions covered by the respective surveys. Furthermore, HORN BACH's DIY stores and garden centers were awarded top rankings in most regions for the criteria relating to product range, value for money, and specialist advice.

2.2 Responsible procurement

2.2.1 Targets and strategy

Consistent, reliable product availability influences both HORN BACH's sales and its customers' satisfaction levels. Procurement and merchandise availability are therefore crucial to the company's business performance. One basic prerequisite involves ensuring the supply capability and reliability of our suppliers at all times. Moreover, in the context of our product responsibility we also attend to compliance with minimum social welfare and environmental protection standards within our supply chain, especially in the case of private label products, timber products, and natural stone products. Private label products account for around one quarter of sales in our DIY retail business. In the B2B business at HBU, which is more strongly focused on manufacturers' brands, private labels account for a medium single-digit percentage of sales.

The minimum standards referred to are set out in HORN BACH's CSR Policy and include the prohibition of child and forced labor, as well as compliance with local environmental legislation.

These targets and strategic requirements basically apply for all companies within the overall Group.

2.2.2 Management approach and measures

For us, the basic requirements of social responsibility include acknowledgement of international standards as codified in the conventions of the International Labor Organization (ILO). ILO requirements form one basis for the audit catalog used in the factory audits HORN BACH commission or performs at its own initiative.

Non-Financial Group Report
2.3 Product responsibility

www.hornbach-group.com
Investor Relations >
Corporate Governance >
HORN BACH Values

Timber is a commodity of particularly great importance for the Group's product range. HORN BACH's CSR Policy requires that we exclusively procure FSC¹-certified tropical timber or timber from sustainable European production. This is intended to ensure that the social welfare and work safety standards set out in the CSR Policy are complied with in the production of the timber. To document the source of the timber used and identify timber products from illegal or disputed sources, HORN BACH works closely with suppliers, particularly in the context of its involvement in the FSC, as well as with environmental protection organizations. Furthermore, when importing natural stones HORN BACH ensures that these come from companies that can document their compliance with international social welfare and work safety standards in regular factory audits.

To monitor the supply chain, the HORN BACH Baumarkt AG subgroup works with an early-warning risk detection CSR system ("CSR map") that was developed in cooperation with the Austrian startup company Sophiesystems and the University of Vienna. The system on the one hand includes the article master data for HORN BACH's DIY product range, as well as supplier audit reports. On the other hand, it provides country-specific information, including corruption indices, environmental indices, and social welfare indices. Together, all this data is used to present a so-called risk tree on the basis of which individual articles can be assessed. Not only that, the CSR map is also connected to a news system that processes items of news in real time. The news items are presented in relationship to the products, factories, and suppliers entered in the system. This way, potential interruptions and CSR-related risks in the supply chain can be rapidly detected and avoided or reduced.

The HORN BACH Baumarkt AG subgroup commissions standardized audits, mainly of production sites for the products which HORN BACH Baumarkt AG stocks as private label products or imports directly from non-EU countries. Upon the preparation of this report, the HORN BACH DIY stores and garden centers and the online DIY shops stocked around 50 private labels from across all five product divisions. The factory audits are conducted by certified, independent audit institutes at least once a year for each production site. Should any failure to comply with these standards be identified, then an action plan is agreed with the respective supplier. The identification of severe infringements would lead to the business relationship being terminated. Merchandise orders may only be placed with those private label and import suppliers that meet HORN BACH's criteria and pass all factory audits. Compliance with requirements in the order process is safeguarded by our SAP QM system and managed by the "Quality Management, Environment, and CSR" department.

Compared with its sister company HORN BACH Baumarkt AG, the HBU subgroup has a significantly lower share of imports and private labels. As of the reporting date, HBU stocked three private labels mainly focusing on product ranges for garden landscaping (natural stones, construction chemicals), plaster, and thermal insulation systems and tiles. Production sites in non-EU countries are audited at least once a year. This task is the responsibility of the Operations Director at HORN BACH Baustoff Union GmbH, who is supported for on-site factory audits by managers from HBU's procurement organization and regional experts specially commissioned for the purpose. The inspection managers are trained in line with HBU's specific requirements and prepared for their audit activities. Like at the HORN BACH Baumarkt AG subgroup, the key focus of the audit is to check compliance with environmental, social, and anticorruption standards.

2.2.3 Target achievement status

On the level of the HORN BACH Baumarkt AG subgroup, a total of 441 factory audits were conducted, mainly at suppliers of private label products and of products directly imported from non-EU countries, in the 2018/19 financial year (2017/18: 423). In the year under report, there were no cases (2017/18: 0) in which the subgroup was required to terminate the business relationship with the supplier as a result of these audits. The HORN BACH Baustoff Union GmbH subgroup performs factory audits at private label suppliers. HBU

¹ Forest Stewardship Council

also did not report any cases in the 2018/19 financial year in which the subgroup was required to terminate the business relationship with its supplier on account of these audits (2017/18: 0).

2.3 Product responsibility

2.3.1 Targets and strategy

Product responsibility is one of the bases of our business success. One key aspect of this responsibility involves product quality, a factor which makes a key contribution to customer satisfaction and trust-based customer retention. As a sustainable retailer, our aim here is therefore to ensure that all products sold by HORNBACH are of irreproachable quality. Furthermore, we believe that responsible procurement and sustainable product features (water-saving, energy-saving, etc.), a factor which also includes environmentally compatible packaging and product disposal, play an ever more important role in how customers perceive companies. These therefore constitute further relevant aspects of our product responsibility.

Our product responsibility particularly relates to private label products, as well as to other imported articles and articles including the commodities of timber and natural stone. Not only that, defective products also pose a risk to the retailer's reputation. We therefore make every effort to ensure the quality of our entire product range.

2.3.2 Management approach and measures

HORNBACH's quality management covers the entire procurement chain, particularly in the case of imported and private label products.

At the HORNBACH Baumarkt AG subgroup, these activities are located in organizational terms at the "Quality Management, Environment, and CSR" department. At HORNBACH Baustoff Union GmbH, responsibility lies with the central procurement department, whose employees report to the Operations Director. The operating units perform the following trial-sample product checks either themselves or by commissioning external service providers. These are intended to safeguard the highest possible level of product quality:

- Merchandise inspection both during production and prior to shipment
- Supervising the loading of merchandise into containers
- Merchandise inspection once the containers arrive at our logistics centers.

The HORNBACH Baumarkt AG subgroup also tests products in terms of safety, contaminants, and suitability for us with the assistance of certified testing institutes and regularly has checks performed on samples from its HORNBACH DIY stores and garden centers. Further tasks include complaints monitoring and product recalls, for example when defects arise in products already in circulation.

Within the product development process, we also work on optimizing the packaging for our private label products. Efforts are made here to reduce the volume of packaging and use recyclable materials and secondary resources.

To assist with environmentally compatible disposal, we offer group-wide solutions for the acceptance and disposal of lighting materials, old electrical appliances, building foam, waste oil, and batteries.

2.3.3 Target achievement status

In the 2018/19 financial year, quality management staff at HORNBACH Baumarkt AG and certified independent audit institutes performed 1,592 (2017/18: 1,732) product quality tests (safety, contaminants, suitability

for use) and 2,339 (2017/18: 2,353) article acceptance audits. Together, these correspond to 4,349 person-days (2017/18: 4,640) performed by independent audit institutes on behalf of HORN BACH.

2.4 Employee satisfaction

2.4.1 Targets and strategy

We are convinced that highly motivated employees are the basis for the company's success. Particularly sales staff and advisors at our DIY stores with garden centers and our builders' merchant outlets play a key role in influencing the satisfaction of our customers. For HORN BACH, a corporate culture which is characterized by open communications, mutual appreciation, and diversity is therefore a basic requirement for upholding a high level of commitment among employees.

As a Group with operations across Europe and employees from nearly 70 countries, we attach priority to creating a working environment that is free of prejudice. Ethnic origin, gender, age, physical restrictions, and religious affiliation are not important to us. The only qualities that count are specialist competence, ambition, commitment, and team spirit.

www.hornbach-group.com
Investor Relations >
Corporate Governance >
HORN BACH Values

2.4.2 Management approach and measures

HORN BACH is convinced that all business relationships are based on trust. Trust is a core message in the HORN BACH Foundation and thus shapes our working life. It is indispensable for ensuring a high level of satisfaction among the company's employees. The measures intended to uphold and improve employee satisfaction are managed by the respective Personnel Departments at HORN BACH Baumarkt AG and HORN BACH Baustoff Union GmbH.

Fair compensation is a component of any trust-based work relationship. HORN BACH ensures that its employees receive pay in line with customary market rates in all of its regions. In Germany, HORN BACH Baumarkt AG voluntarily adheres to the collectively agreed rates for the retail sector throughout the country. We draw on a variety of models to enable our employees to participate in the company's success.

To offer employees a neutral point of contact, HORN BACH has created the position of ombudsman. He acts as contact partner to all HORN BACH employees in difficult situations. His main job is to act as an intermediary and arbitrator in misunderstandings and conflicts. This neutral point of contact is used by employees from across the Group and has met with high acceptance levels.

Furthermore, at HORN BACH Baumarkt AG the appropriate representation of our employees in Germany is safeguarded with our General Works Council, works councils at nearly all German locations, and the equal representation of employees and shareholders on the Supervisory Board of HORN BACH Baumarkt AG. Consistent with the German Works Council Constitution Act, we work with all works councils on a basis of trust.

Non-Financial Group

Report

2.6 Employee development
and retention

2.4.3 Target achievement status

To measure and manage employee satisfaction levels, we refer to the personnel turnover rate as a quantitative indicator. In the year under report, the personnel turnover rate² amounted to 12.6 % (2017/18: 11.9%). No cases of discrimination or infringements of the German General Equal Treatment Act (AGG) were identified in the year under report.

2.5 Employee recruitment

2.5.1 Targets and strategy

HORN BACH has a great need for specialist and management staff at its HORN BACH DIY stores and garden centers, builders' merchant outlets, logistics centers, and administration departments. As a general rule, we aim to meet our requirements for specialist and management staff with internal candidates.

2.5.2 Management approach and measures

We recruit a large share of our fresh talent from HORN BACH's training and study programs. We basically train the right number of people to cover our own requirements. This way, we ensure that all trainees and participants in dual work-study programs have good chances of being accepted by the company once they have successfully completed their training or study program. Recruitment is managed on a decentralized basis in line with requirements at individual locations. In selecting suitable applicants, the operating units are assisted by the relevant personnel department.

We aim to adapt the range of training positions on offer to current requirements in both quantitative and qualitative terms. To cover our need for personnel we work closely together, for example, with Chambers of Industry and Commerce (IHK), colleges offering dual work-study programs, and various cooperation partners in other European countries. Given the rapid advance of digitalization, numerous new vocational programs have arisen in recent years, such as the "E-commerce specialist" dual work-study program at HORN BACH Baumarkt AG. The first generation of this newly created vocation began training in August 2018. The HORN BACH Baumarkt AG subgroup helped to introduce this new training vocation and already employs two "E-commerce specialist" trainees.

In training the next generation of suitably qualified staff, we benefit from the high quality standards offered by the dual vocational training system in Germany, among other factors. The HORN BACH Baumarkt AG subgroup also works with comparable dual work-study training programs in Austria and Switzerland. Not only that, in Romania we are working with other retailers and the International Chamber of Commerce to permanently establish a dual vocational training system. In the past financial year, HORN BACH Romania employed 43 trainees in their first or second training years.

Furthermore, we also access potential applicants by participating in recruitment fairs and applicant training programs across Europe in cooperation with local or regional organizations, as well as with our presence in numerous digital media.

Non-Financial Group

Report

2.5 Employee satisfaction
2.6 Employee development
and retention

Various factors meant that recruiting new employees was a challenge in the year under report. The unemployment rate is very low across large parts of Europe. Moreover, the trend towards studying for a university degree is continuing and has exacerbated the already low attractiveness of the retail sector. Providing very good working conditions and development opportunities is therefore one of the key focuses in our efforts to recruit employees for HORN BACH.

² Number of (employee) resignations and (employer) terminations as a percentage of average number of employees in financial year. Calculation method amended since previous year.

2.5.3 Target achievement status

We collect quantitative key figures on trainees and current vacancies. We do not have any specific targets in respect of the key figures thereby collected. The recruitment of new employees is always based on current requirements.

In 2018/19, HORNBACH employed 1,014 trainees and participants in dual vocational training programs (2017/18: 970). A group-wide total of 349 trainees completed their training in the year under report (2017/18: 362), of which 63.4 % were accepted for regular employment (2017/18: 58.3%). Including trainees accepted for a third year of training, the acceptance rate came to 71.3 % (2017/18: 67.7%).

2.6 Employee development and retention

2.6.1 Targets and strategy

Given our strategic focus on project customers, we have a great requirement for well-informed employees, particularly at our stores and builders' merchant outlets, who are able to competently support our customers in complex construction and renovation projects. High-quality advice and service play a key role in determining the satisfaction of our customers and the Group's business performance and situation. Specialist staff in the stationary business therefore have to be familiar with the products offered within their area of activity and their uses, and must also be promptly trained when new models are introduced.

Where possible, key positions and management positions becoming vacant should be filled with internal candidates. By offering a range of development measures, we aim to act early to prepare suitable employees in a forward-looking manner for future positions.

A further declared aim of HORNBACH is to retain a large number of experienced employees at the company. Both the company and its customers benefit from the longstanding experience these employees have of HORNBACH's product range and services.

2.6.2 Management approach and measures

Practical knowledge about the products and their applications is communicated in practical and product-based training sessions offered in cooperation with suppliers. In addition, HORNBACH offers its own product and project-based training at on-site events or by video or print media. These concepts were developed further in the year under report and introduced in all countries in which HORNBACH operates. Furthermore, we work together with Chambers of Industry and Commerce and thus provide our employees with access to certified training programs. These include qualification as a retail specialist, for example. Regular training is available in internal and external seminars across the Group. These employee development and retention measures are managed by the relevant personnel departments at HORNBACH Baumarkt AG and HORNBACH Baustoff Union GmbH.

The delivery of goods is a key service provided to customers by HORNBACH Baustoff Union GmbH. For this, employees need a professional driving qualification. To maintain this qualification, HORNBACH Baustoff Union GmbH offers regular module training for its total of around 100 professional drivers. Where necessary, it also enables further employees to acquire their professional driving qualification.

We prepare upcoming management staff at the HORNBACH Baumarkt AG subgroup for their new tasks with a separate training program. To this end, qualification modules have been developed for all store management positions. HORNBACH offers corresponding development opportunities to employees at its central administration departments and logistics centers as well. Employees can also obtain regular training at in-house and external seminars.

By holding regular meetings between HORNBACH managers and their employees, we aim to help make sure that all employees can develop their skills further in line with their needs and strengths. We believe that offering individual development opportunities is an effective way to boost employees' commitment to HORNBACH.

HORNBACH provides its employees with a number of additional services. These include, for example, profit participation, payment of vacation and Christmas allowances, and the option of participating in a company pension scheme by way of direct insurance that is additionally subsidized by the employer. Furthermore, the HORNBACH Baumarkt AG subgroup offers a number of further employee retention instruments. Among others, these include working time accounts, nursing care advice for employees with relatives needing care, and a fitness and wellness network.

2.6.3 Target achievement status

No quantitative targets are in place to measure employee development, as training requirements may vary over time. With regard to the sub-aspect of employee retention, the Group also refers to the personnel turnover rate as an indicator.

2.7 Compliance

Our compliance-related objectives, measures, and results are presented in the Corporate Governance Report with the Corporate Governance Declaration, Chapter 6.2 Compliance, of the HORNBACH Holding AG & Co KGaA Group.

Neustadt an der Weinstraße, May 20, 2019

HORNBACH Holding AG & Co. KGaA

Independent Auditor's Limited Assurance Report

The assurance engagement performed by Ernst & Young (EY) relates exclusively to the German PDF version of the group non-financial statement 2018/2019 of HORNBACH Holding AG & Co. KGaA. The following text is a translation of the original German Independent Assurance Report.

To HORNBACH Holding AG & Co. KGaA, Neustadt an der Weinstraße

We have performed a limited assurance engagement on the group non-financial statement of HORNBACH Holding AG & Co. KGaA according to § 315b HGB ("Handelsgesetzbuch": German Commercial Code), consisting of the non-financial report and the chapter "compliance" in the corporate governance report with corporate governance declaration being incorporated by reference (hereafter non-financial statement), for the reporting period from 1 March 2018 to 28 February 2019. Our engagement did not include any disclosures for prior years.

A. Management's responsibility

The legal representatives of the Company are responsible for the preparation of the group non-financial statement in accordance with §§ 315c HGB.

This responsibility includes the selection and application of appropriate methods to prepare the group non-financial statement as well as making assumptions and estimates related to individual disclosures, which are reasonable in the circumstances. Furthermore, the legal representatives are responsible for such internal controls that they have considered necessary to enable the preparation of a group non-financial statement that is free from material misstatement, whether due to fraud or error.

B. Auditor's declaration relating to independence and quality control

We are independent from the entity in accordance with the provisions under German commercial law and professional requirements, and we have fulfilled our other professional responsibilities in accordance with these requirements.

Our audit firm applies the national statutory regulations and professional pronouncements for quality control, in particular the by-laws regulating the rights and duties of Wirtschaftsprüfer and vereidigte Buchprüfer in the exercise of their profession [Berufssatzung für Wirtschaftsprüfer und vereidigte Buchprüfer] as well as the IDW Standard on Quality Control: Requirements for Quality Control in audit firms [IDW Qualitätssicherungsstandard: Anforderungen an die Qualitätssicherung in der Wirtschaftsprüferpraxis (IDW QS 1)].

C. Auditor's responsibility

Our responsibility is to express a limited assurance conclusion on the group non-financial statement based on the assurance engagement we have performed.

We conducted our assurance engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3000 (Revised): Assurance Engagements other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board (IAASB). This Standard

requires that we plan and perform the assurance engagement to obtain limited assurance about whether the group non-financial statement of the Company has been prepared, in all material respects, in accordance with §§ 315c HGB. In a limited assurance engagement the assurance procedures are less in extent than for a reasonable assurance engagement and therefore a substantially lower level of assurance is obtained. The assurance procedures selected depend on the auditor's professional judgment.

Within the scope of our assurance engagement, which has been conducted primarily from March to May 2019, we performed amongst others the following assurance and other procedures:

- Inquiries of employees regarding the selection of topics for the group non-financial statement, the risk assessment and the concepts of HORNBACH Holding AG & Co. KGaA for the topics that have been identified as material,
- Inquiries of employees responsible for data capture and consolidation as well as the preparation of the group non-financial statement, to evaluate the reporting processes, the data capture and compilation methods as well as internal controls to the extent relevant for the assurance of the group non-financial statement,
- Inspection of relevant documentation of the systems and processes for compiling, analyzing and aggregating data in the relevant areas, e.g. human resources, in the reporting period and testing such documentation on a sample basis,
- Inquiries and inspection of documents on a sample basis relating to the collection and reporting of selected data,
- Analytical procedures at group level regarding the quality of the reported data,
- Evaluation of the presentation of disclosures in the group non-financial statement.

D. Assurance conclusion

Based on our assurance procedures performed and assurance evidence obtained, nothing has come to our attention that causes us to believe that the group non-financial statement of HORNBACH Holding AG & Co. KGaA for the period from 1 March 2018 to 28 February 2019 has not been prepared, in material respects, in accordance with §§ 315c HGB.

E. Intended use of the assurance report

We issue this report on the basis of the engagement agreed with HORNBACH Holding AG & Co. KGaA. The assurance engagement has been performed for the purposes of the Company and the report is solely intended to inform the Company as to the results of the assurance engagement and must not be used for purposes other than those intended. The report is not intended to provide third parties with support in making (financial) decisions.

F. Engagement terms and liability

The “General Engagement Terms for Wirtschaftsprüfer and Wirtschaftsprüfungsgesellschaften [German Public Auditors and Public Audit Firms]” dated 1 January 2017 are applicable to this engagement and also govern our relations with third parties in the context of this engagement (www.de.ey.com/general-engagement-terms). In addition, please refer to the liability provisions contained there in no. 9 and to the exclusion of liability towards third parties. We assume no responsibility, liability or other obligations towards third parties unless we have concluded a written agreement to the contrary with the respective third party or liability cannot effectively be precluded.

We make express reference to the fact that we do not update the assurance report to reflect events or circumstances arising after it was issued unless required to do so by law. It is the sole responsibility of anyone taking note of the result of our assurance engagement summarized in this assurance report to decide whether and in what way this result is useful or suitable for their purposes and to supplement, verify or update it by means of their own review procedures.
